

To the Acting Chief of the Lincoln Fire and Rescue Department:

Sir, I am one of the department's biggest supporters and I would like to thank the Lincoln Fire and Rescue Department for all of the hard work they do.

During the past six months I have been working on photographing all of the equipment and stations of the Lincoln Fire and Rescue Department. During that time the members of your department have been very respectful and very helpful in helping me to accomplish this goal. The guys at Truck 8 were fantastic in their help. I was able to take a couple pictures of them as they were driving south bound on 16th Street and when I showed up at their Station a little while latter they had no problem at all pulling the rig out and letting me get a few pictures of the rig.

That has been the general attitude of all of the members of your department. For that I am very thankful. Some have stared in disbelief as I snap away pictures of them as they are responding to calls and sometimes as I am driving by them.

All of the pictures and videos that I have taken of the Department's Equipment have ended up on my personel website as well as a tribute Video/Slideshow that I have put together about the Department. I would like to share this with you and your men. That is the reason behind this email.

The Website is listed below and I hope that you and your men enjoy the site.
